

Summary of TRIAZ[®] Safety Information

TRIAZ[®] is approved for the topical treatment of acne vulgaris. TRIAZ should not be used by people who have allergies or hypersensitivity to any of its ingredients. If you experience a reaction or sensitivity to TRIAZ, stop use of the product and contact your doctor. When using TRIAZ, avoid unnecessary exposure to the sun and use a sunscreen. TRIAZ is for external use only; avoid getting the products in or on your eyes, eyelids, lips, or mucous membranes. The most common side effects reported by patients using topical benzoyl peroxide, the active ingredient in TRIAZ, are allergic contact dermatitis and dryness. The safe and effective use of TRIAZ in children has not been established.
